

ONE MINUTE GIVEBACK

A CSR initiative supported by

Asian Battery Conference, with Sorfin Yoshimura, is raising funds for Siem Reap's Angkor Hospital for Children.

Angkor Hospital for Children is a flagship hospital pioneering specialty treatments and care rarely available elsewhere in Cambodia, with some of the most sophisticated facilities and clinicians in the country.

Specialty care offered at AHC includes long-term conditions like asthma, diabetes and epilepsy, neonatal and paediatric intensive care and over 30 types of cancer treatments, especially eye and blood cancers.

All proceeds will be used to help ensure families living in poverty have access to healthcare for their children via the free medical services the Hospital provides.

Angkor Hospital for Children

The impact we can make

Want to get involved? Contact Scott Fink from Sorfin Yoshimura or Mark Richardson from the 20ABC organising team as we would love to hear from You!
